Jesus Arellano Delgado

Web developer with solid programming knowledge and a specialization in process automation. Passionate about creating innovative and efficient solutions, with a strong focus on problem-solving. I have the ability to work both independently and collaboratively, quickly adapting to dynamic environments and actively participating in all stages of project development. I am seeking opportunities to apply and expand my skills in web development and the implementation of intelligent automations.

Skills

- Mysql • SQL Server • Oracle
- Javascript • HTML • PHP • Laravel
- Visual Basic • Asp Classic • Asp .net
- Express • Angular • Typescript • C++
- c# • git • Docker • Node js • Api's

Soft Skills

- Teamwork • Problem-solving
- Empathy • Adaptability

Education

- Conalep 1 Aguascalientes
  - **IT Technician (2016-2019)**
- Universidad Politécnica de aguascalientes
  - **Systems Engineer (2019-2023)**

Languages

English B-2

Work Experience

Junior Programmer
Motera Development & Consulting
06/2024 - Present
Worked remotely with the PHP programming language, developing multiple modules, implementing various libraries, and creating new plugins in TypeScript to meet the needs of end users. Created new tables for the MySQL database while maintaining existing normalization levels, adding indexes to optimize query execution times. Collaborated on the project for 7 months, from its inception to production launch and final user training.

Junior Programmer
Corporativo Rainde
05/2023 - 05/2024
Contributed to the support and development of new modules for an ERP specialized in logistics and transportation companies, using programming languages such as HTML, CSS, Classic ASP, ASP.NET, and SQL Server. Configured web services for CFDI stamping generation, ensuring compliance with tax requirements and enhancing efficiency in the invoicing process. Collaborated closely with my team to achieve efficient results and meet client needs, maintaining constant communication and effective synergy. Designed reports using Crystal Reports and PDF Sharp, providing users with detailed and visually appealing information to support business decision-making.

Junior Programmer
MexQ
06/2022 - 04/2023
This was my first professional job related to my field in systems. Here, I designed and developed a complete sales system using web technologies such as HTML, CSS, React, JavaScript, and managed the database with MySQL. Provided first-line technical support to end users, effectively resolving issues and ensuring a smooth system experience. Created detailed documentation, including procedures and manuals, to facilitate user and support staff understanding and efficient system use.
